

Company Profile

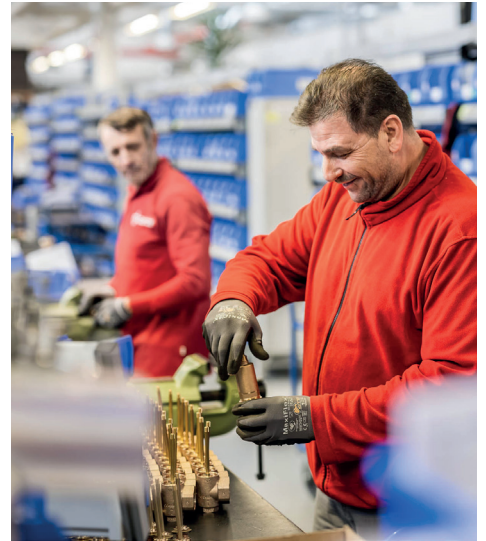

Issue 02

It's all at Albion

Albion Valves (UK) Limited has been a trusted supplier to the UK's HVAC and industrial markets for over 30 years, and the Albion brand has been around for over 40 years! Albion's aim is to supply a readily available, complete, quality valve solution alongside excellent cradle-to-grave support and service. Despite our route to market being exclusively through our network of independent distributors we will always offer a helping hand to contractors and consultants within the industry.

Quality All of our valves are designed and manufactured in accordance with the relevant industry standards; all threads comply with ISO 7/1, ISO 228/1, or ANSI B1.20.1, all raw materials are in accordance with EN 10204, and valves conform to the relevant British, European, and International specification standards, for example, EN 1092 for flange connections and ISO 4144 for stainless steel fittings. After production, the valves are then subject to rigorous batch testing and are inspected by our own independent team for quality and compliance. Our valves carry the necessary product approvals, such as, WRAS, EN331, EN161, ATEX, and API STD 607, and every product comes with a minimum warranty of 12 months, with many ranges covered for 5 years, ensuring we only supply reliable and quality products. As a socially responsible company, we conform to ISO 9001, ISO 14001, and ISO 45001.

Service With a wealth of experience in all things valves and systems, it enables us to provide valuable support from cradle-to-grave. With in-house technical and quality teams and a team on the road covering the whole of the UK, Ireland, and the MENA region, you can rest assured that we're always on hand to help. The development of our Projects Team has improved our efficiency when offering specification and sizing support, reviewing schematics and returning labelled drawings, Bill of Materials, Technical Submittals and quotes. Whats more, we are keen to pass on our expertise to the industry, which is why we have a comprehensive suite of CIBSE-approved CPDs.

Delivery We know the importance of having the right products on time every time. This is why we deliver 95% of products next-day with 99.98% accuracy in the UK from our 36,000 sq ft warehouse and lead times in the MENA region are kept to a minimum with our stock holding in the Jebel Ali Free Zone and the stock held locally by our distributors.
